

Luis Monroy

Full Stack Web Developer | Backend & API Specialist

✉ cv@luismonroy.dev ☎ 2224657277 📍 Puebla, México

PROFILE

Full Stack Web Developer with a strong analytical background in Mathematics and Software Engineering. Specialized in REST API development and SPA creation. Proven experience managing the entire software development lifecycle—from requirement gathering to deployment and server administration (Windows and Linux environments). Focused on operational optimization, data analysis, and building secure, scalable application ecosystems.

PROFESSIONAL EXPERIENCE

Interactive Systems Controller E3

Instituto Mexicano del Seguro Social (IMSS)

02/2024 – Present

Puebla, México

- Lead the design, architecture, and full-stack development of intranet web applications, managing the complete software development lifecycle.
- Engineered SIBOP, a central inventory and operational hub serving ~200 users that provides authentication and data-sharing via REST APIs to multiple micro-modules.
- Optimized consumable delivery response times by 864% (from 3 days to 5 minutes) and decreased technical report closure times by 25% through the SIBOP platform.
- Develop Power BI dashboards and execute complex cross-database queries to extract key operational metrics (attention times, installation KPIs, and consumable usage), enabling data-driven decision-making.
- Implemented DIGMA, a multimedia broadcasting system utilizing WebSockets and message queuing to remotely manage real-time content across 52 displays at San Alejandro Hospital.
- Developed SEAEP, a dynamic, just-in-time exam generation engine designed to prevent data leaks and corruption, integrating institutional question banks.
- Created the FOCI administrative platform for KPI tracking and workflow automation; currently developing automated scripts for the proactive maintenance of medical databases (SIMF).
- Developed and maintain a foundational legacy system in Vanilla PHP for configuration documents, handling 8,000+ historical records for ~50 daily users.
- Digitized mandatory daily absenteeism reporting, transforming a manual management process into an automated data pipeline.

EDUCATION

Master's in Software Engineering and Computer Systems

UNIR

04/2025 – Present

B.S. in Mathematics

Benemérita Universidad Autónoma de Puebla - BUAP

2019 – 2024

B.S. in Software Development

Instituto de Estudios Universitarios - IEU

2019 – 2022

SKILLS

- **Backend:** Laravel, PHP (Modern/Vanilla), Python, REST API Architecture & Integration, WebSockets.
- **Frontend:** React (SPA), JavaScript.
- **Databases & BI:** SQL Server, Complex relational queries, Power BI.
- **Infrastructure & Servers:** Windows Server, IIS, Ubuntu Server, Nginx.
- **Tools & DevOps:** Git, Postman, Power Automate.
- **Languages:** Spanish (Native), English (B1).
